RLC latency rises sharply at higher UE downlink throughput
(a) All valid 1-second observations
(b) Paired median of each run
Best effort (UE 0)
Medium (UE 1)
High (UE 2)
DL RLC SDU delay (ms, log scale)

UE downlink throughput (Mbit/s)
Median UE downlink throughput (Mbit/s)
Across 5 runs and 3 UEs
5.30 Mbit/s: 1.32 ms
9.95 Mbit/s: 4.92 s
No-control characterization; five repetitions. Raw delays outside the xApp-valid 0–6,000 ms range are excluded.
